# O3b mPOWER

O3b mPOWER is SES's second-generation medium earth orbit (MEO) system. It builds on the proven commercial success of SES's current O3b constellation, which has been delivering low-latency, fibre-like services since 2014. With a fleet of 20 MEO satellites, O3b supports:

Mobile networks with more than **15 million end users**

**Four out of the top six** oil and gas super majors

**Five of the top six** cruise lines

And enabling the cloudscale era for **millions of people worldwide**

O3b mPOWER system comprises an initial constellation of 13 high-throughput satellites that operate 8,000km away from the Earth's surface, as well as extensive ground infrastructure. With six satellites launched and delivering global services as of April 2024, O3b mPOWER offers unrivalled performance to our mobility, telecom, government, and enterprise customers, enabling their most critical operations and key revenue streams with high throughput, predictable low latency, and high availability, all backed by robust service level agreements.

Built by Boeing and launched by SpaceX, the O3b mPOWER system comprises more than 30 technology partners that range from ground system partners (e.g. Intellian, AvL, Isotropic Systems, Gilat, ST Engineering iDirect, Comtech) to software development partners (e.g. Amdocs, Microsoft).

**Key details include:**

- Capacity**

Terabit-level system capacity based on dynamic ability to deliver thousands of uncontended managed services from tens of Mbps up to multiple Gbps per service.
- Flexibility**

Route customer traffic anywhere, optimise forward and return path, bandwidth provisioning and control network resources to dynamically allocate capacity where needed.
- Coverage**

Expansive reach covering 96% of the global population.

## VERTICAL MARKETS & CUSTOMERS

- Mobility**

Cruise, commercial shipping, and aero

- Telecom**

Telco, mobile network operators, and cloud providers

- Government**

Military, government agencies, and non-governmental organisations

- Enterprise**

Oil & gas, mining, and other businesses

## O3b mPOWER CUSTOMERS

### MNO, Cloud, and Service Partners:

### Cruise:

### Joint Venture:

GEO	NGSO MEO	NGSO LEO
36,000km	~ 8,000km	~ 1,000km
Medium latency (~700 msec)	Low latency (~150 msec)	Very low latency (~50 msec)*
Very large Earth view	Large Earth view	Small Earth view
Few fixed gateways	Several flexible gateways	Numerous local gateways
Stationary antennas (3 satellites for global coverage)	1-hour slow tracking (6 satellites for coverage)	10-minute fast tracking (100's-1,000's needed for coverage)
Proven, deployable technology	Proven, deployable technology'	Technology still in development for satellite internet

\* Gateway distance, ISL & ground network dependent
